

PCR TESTING

Gastro Intestinal Testing—FAST!!!
DNA Based Pathogen testing

An opportunity for your office to provide a fast and efficient turnaround on Gastro Intestinal testing

Early diagnosis is the key to prompt and effective treatment.

22 Different pathogens tested
5 Viruses and 13 bacteria and
4 parasites

Why perform overnight Gastro-intestinal testing?

- Tests for 22 different pathogens
- Tests for pathogen DNA therefore no need to wait for cultures
- Unmatched speed of testing and accuracy of results
- Specimen collected via fecal or anal swab
- Safe and higher patient acceptance
- Enables quick diagnosis to ensuring early and correct treatment

We know that diagnostic testing is the foundation of an effective medical practice, which is why we provide the best in innovative technologies to give general medical practitioners the best results available

1. Campylobacter
