Why perform an advanced urine screen?

- Identify potential cancers 3 to 6 months earlier
- Use the EXISTING urine samples you receive through your toxicology testing
- Test can be easily added to your existing requisition forms
- Provides cytology and Urovysion FISH to your urine samples
- Your laboratory earns additional revenue from the additional testing
- Significantly improve profitability
- Truly can save patient lives through early detection of risk and abnormality
- Highly experienced Laboratory partner
- Accurate and easy to read reports
- Timely results
- Close to \$100 additional profit on average per cup

Significant opportunity to add to your current laboratory offer and generate additional revenue while saving patient lives.

Who should be tested?

- Current or past smokers
- Patients over 40 years of age
- Family history of bladder cancer
- Individuals exposed to dyes or chemicals, including hair dyes
